US Liner Company Releases New Video Showcasing Integral Wall Liners

CRANBERRY TOWNSHIP, PA – US Liner Company (USLCO), the world leader in engineered reinforced composite materials, is pleased to announce the release of a new video showcasing the company's Integral Wall Liners, now exclusively available from US Liner.

Michael LaRocco, President & CEO for US Liner states, "The new video provides a better understanding of our manufacturing process, and showcases why US Liner has set the standard for performance, leading the industry in strength, durability and protection." US Liner offers a unique, state-of-the art Thermal Fusion Process that provides unmatched strength and durability that others simply do not offer.

"Don't compromise." said Jeff Meek, Vice President of Sales and Marketing for US Liner. "The only way customers will know they're getting the best is to buy the original. On your next order, specify US Liner Integral Walls - Bulitex, Versitex or Ecotex – or ask about our Hybrid Combinations."

US Liner Company developed the industry's first glass reinforced thermoplastic composite liner in 1998. "We introduced the first Integral Refrigerated Wall Liner in 2001, seamlessly fusing the scuff and wall panels for added durability. We've been protecting valuable cargo and equipment for over 15 years – that's more than all competitors combined. Our Integral Wall Liners are protecting more than 200,000 trailers and counting!" added Meek.

The video is now available online through the company website (www.USLCO.com, click on the Engineered Solutions tab) and on USLCO's YouTube Channel (<http://www.youtube.com/watch?v=L0HKOsOCpU4>).
